

Environmental

RESHAPING AND SUSTAINING THE ENVIRONMENT

Ball Janik LLP's Environmental practice offers a multi-disciplinary array of services unique among Pacific Northwest law firms. What sets us apart is a versatile team of lawyers that can solve problems in environmental law and science, land use and real estate law, and litigation.

We have assisted clients with energy facility siting, water rights and environmental permitting. Our lawyers have helped clients acquire and develop numerous "brownfield" sites, reinvigorating the landscape of the Portland metropolitan region. We represent clients in environmental due diligence reviews that facilitate major real estate and corporate transactions. Our litigators have prosecuted and defended cleanup cases and have handled landmark environmental insurance coverage matters, recovering millions of dollars for our policyholder clients.
