

# Finance and Corporate

## GUIDING BUSINESS ON A PATH TO SUCCESS

Ball Janik LLP's Finance and Corporate practice grew out of our extensive Real Estate practice and now encompasses a wide range of business services. We assist clients with entity selection, formation and maintenance, capitalization and financing, business and tax advice, acquisitions, and reorganizations. Our attorneys provide pragmatic business advice firmly grounded in their knowledge of corporate and securities law, contracts, taxation, and employee relations issues. We also cultivate industry-specific knowledge that gives us special insight into the challenges faced by our clients. These skills have made us valued counselors to businesses in diverse industries, including finance, technology, health care, forest products, media, real estate development, food service and hospitality, distribution, retail, and construction.

No matter the issue or industry, our bottom line is the same: To understand our clients' business goals so that we can guide them successfully through even the most complex challenges.
